Our Services

Using only industry leading products, based on their sustainability, performance, and quality.

Cavity Wall Insulation

- Maximum Thermal Performance
- Maximum Acoustic Performance
- Interior and Exterior Install Methods
- Silicon Treated for Moisture Protection
- Recycled Glasswool Material
- Code Mark Certified
- Ideal for Inaccessible Areas
- Sustainable and Eco-Friendly

Spray Foam Insulation

- Open Cell & Closed Cell Polyurethane Foam
- Superior Thermal & Acoustic Solution
- Eco-friendly and Sustainable
- Complete Air Tight and Waterproof Solution
- High Thermal Value Per mm
- Safe and Sustainable
- Protective Coatings
- Certified Applicators
- Suitable for Entire Building Envelope

Using only industry leading products, based on their sustainability, performance, and quality.

Bulk Insulation Batts

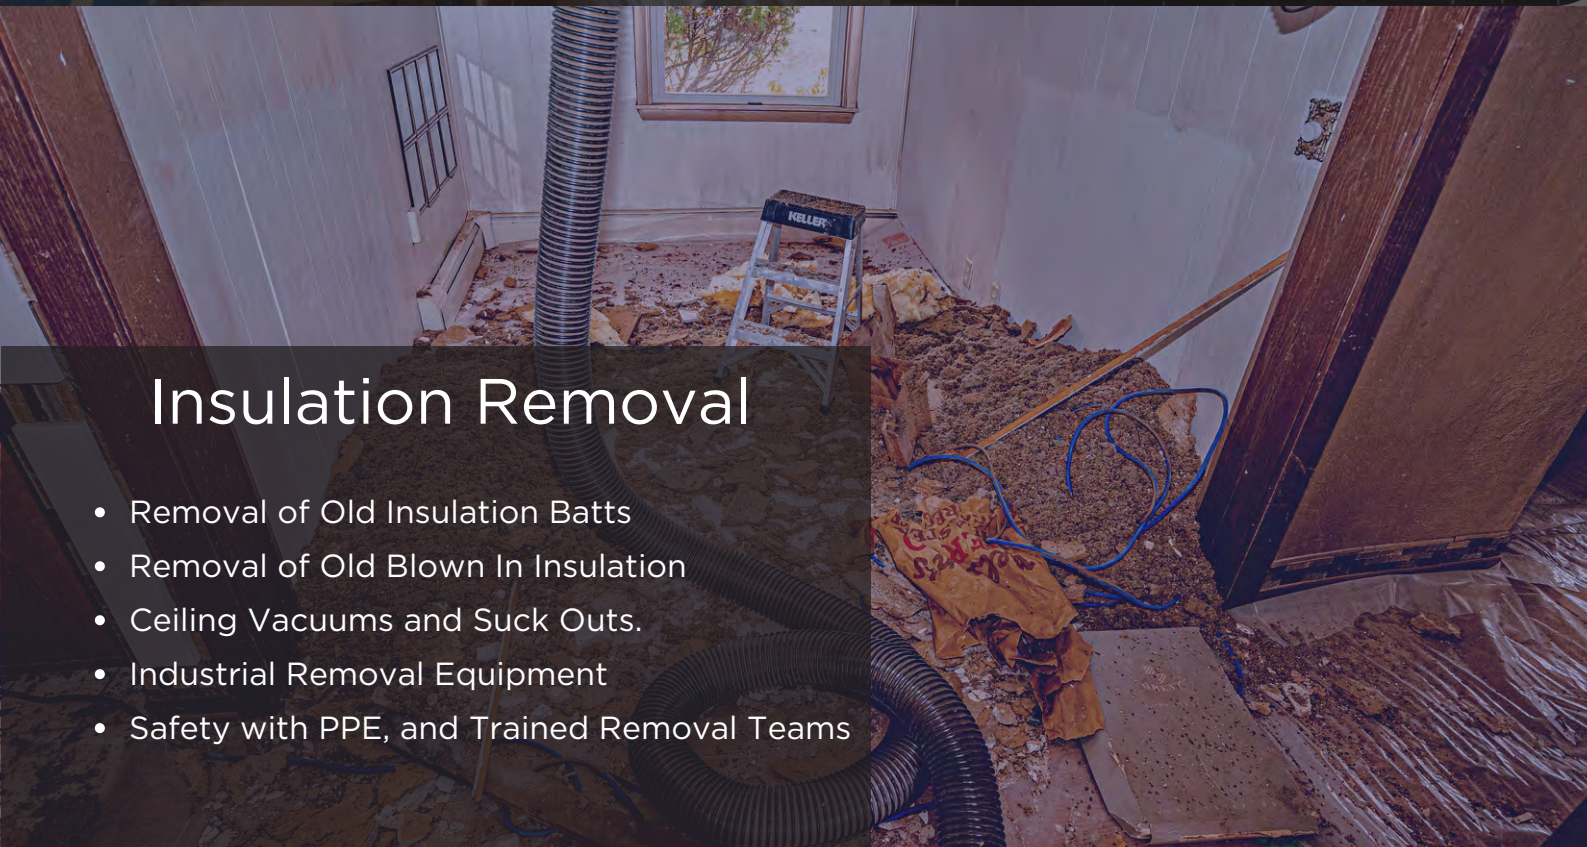

- Maximum Thermal Performance
- Maximum Acoustic Performance
- Sustainable and Eco-Friendly
- 30 year product warranty
- Suitable for Entire Building Envelopes
- R1.5 to R6.0 Thermal Value Ranges
- R4.1 New Build Insulation

Our Services (cont.)

Using only industry leading products, based on their sustainability, performance, and quality.

Whole of Project Solutions

- Tailored solutions to unique requirements of each project.
- Project consultation from initial design to installation and maintenance.
- Quality assurance with certification of product code and installation techniques.
- Implementing energy-efficient and sustainable solutions that align with project goals.
- Collaborative engagement with clients, architects, and builders to ensure insulation solutions align perfectly with the overall project objectives.

Our Services (cont.)

Using only industry leading products, based on their sustainability, performance, and quality.

A photograph showing a blower door testing setup. A large red and yellow fan unit is positioned in a doorway, with a smartphone mounted on top displaying data. The room behind the door is illuminated with red light, and the room in front is in natural light. A blue container is visible on a counter to the right.

Energy Efficiency Ratings

- NatHERS Energy Reports - Residential
- Blower Door Testing - Airtightness testing
- NABERS - Commercial Energy Reporting
- Section J Reporting
- Energy Building Consultation

A photograph of a lounge area featuring a blue tufted sofa and a wall covered in blue acoustic panels. A dark semi-transparent box is overlaid on the right side of the image, containing text.

Acoustic Solutions

- Residential Acoustic solutions
 - Acoustic rated insulation batts,
 - Acoustic rated wall cavity insulation,
- Rigid Acoustic Boards
 - Offices
 - Warehousing
 - Homes
 - Schools
 - Hospitality

Industries & Applications

Retrofit Existing Homes

- Removal Of Old Insulation
- Ceiling Vacuums
- Install New Insulation
- Entire Building Envelope
 - Ceilings
 - Roofs
 - Walls
 - Underfloors
 - Cavities
- Sheds
- Modulars
- Containers

New Builds & Commercial

- Supply & Installation of Insulation for
 - Developments
 - New Builds
 - Commercial Sites
- Entire Building Envelope
- Workshops
- Warehousing
- Restaurants
- Gyms
- Schools

Industrial Solutions

- Thermal and Energy Solutions for
- Silo's
- Poultry Sheds,
- Warehouse & Storage
- Mining Camps
- Protective Coatings
- Piping Insulation
- Shipping Containers

Core Capabilities

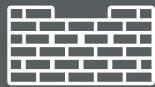

SUPPLY AND INSTALL INSULATION BATTS

We supply and install a wide range of insulation batts specified for roof, ceiling, walls, subfloors and mid floors.

REMOVE & DISPOSE INSULATION

Remove and dispose inferior insulation batts, old blow-in insulation, dust and debris.

SPECIALISED CAVITY WALL INSULATION

Certified provider and installer of glass wool CavityWall insulation pumped into 50mm + wall cavities and inaccessible areas.

GUARANTEE OF INSULATION SUPPLY

Through EEG's long term relationship with material suppliers, we guarantee secure product availability and quality.

TECHNICAL INSULATION TEAM

Technically trained and highly capable projects team ensuring quality of advice on thermal, energy, and acoustic requirements of all projects are met.

CAPABILITY AND INSTALL RATE

EEG installers are trained and employed in-house ensuring quality and supervision of workmanship capable of up to 10,000m² install rate per day.

SPRAYFOAM INSULATION SPECIALIST

Supplier and installer of closed-cell spray foam insulation products providing superior airtightness and R value.

About The Energy Efficiency Group

EEG is a specialist company providing world leading insulation products and services for all industry sectors dedicated to maximizing both the thermal, acoustic, and energy efficiency of any project.

Through it's divisions they are one of the most trusted names in the insulation industry establishing an unprecedented reputation by aligning the whole team with core values, professionalism and service.

Australian Owned and Operated

Over 10,000 Australian Homes Retrofitted

Over 1,000 Executed Commercial and Residential Development Projects

90+ Certified and Trained Insulation Installers

Focused on Sustainability and Environmental Impact

Divisions

As a vertically integrated company, EEG operates under the following nationally recognized brands.

Our Mission & Vision

INSULATION INDUSTRY LEADER

We are always striving to be at the forefront of sustainability and quality ensuring the products we utilise are rigorously tested, certified, and approved for Australia's harshest conditions.

OUR PEOPLE

To develop our people to be better every day by implementing a strong culture of training, learning, and personal development.

OUR PURPOSE

To maximize the thermal, acoustic and energy efficiencies to meet all project requirements in either residential, industrial, or commercial sectors.

OUR SAFETY

Through our culture of training and zero tolerance for safety incidents, we implement a safety first attitude on every site.

OUR VALUES

Are to echo throughout; either in the office or on the field, being; Family, Trust, Integrity, and Loyalty.

Notable Projects

We have worked with over 10,000 individual homeowners and the following projects:

Project: ATSC Building Modernization Perth Airport
Scope: Cavity Wall Insulation to existing building to improve thermal and acoustic performance.

Project: Water Corporation
Scope: Cavity Wall Insulation to increase thermal & acoustic performance of switchrooms.

Project: Department of Biodiversity & Conservation
Scope: Removal of insulation, new insulation install for Kings Park Heritage Building .

Project: Woolworths Maryborough
Scope: Spray Foam Insulation to under-slab below cool rooms & cases.

Project: RCQ Developments
Scope: Wall wrap and insulation install for 45 townhouse development.

Project: Shipping Container Co
Scope: Spray Foam Insulation for containers destined to withstand the Antarctic climate.

Project: Shenton Park Apartment Complex
Scope: Cavity Wall Insulation to upgrade thermal & acoustic performance.

Project: Casino Upgrade
Scope: All Insulation services to for the upgrade of the The Star Casino

Project Spotlight

Project: Mineral Resources Mining Camp

Scope: Insulating 375 Pod Project for Mineral Resources Luxury Mining Camp with underfloor insulation with Closed Cell Spray Foam.
